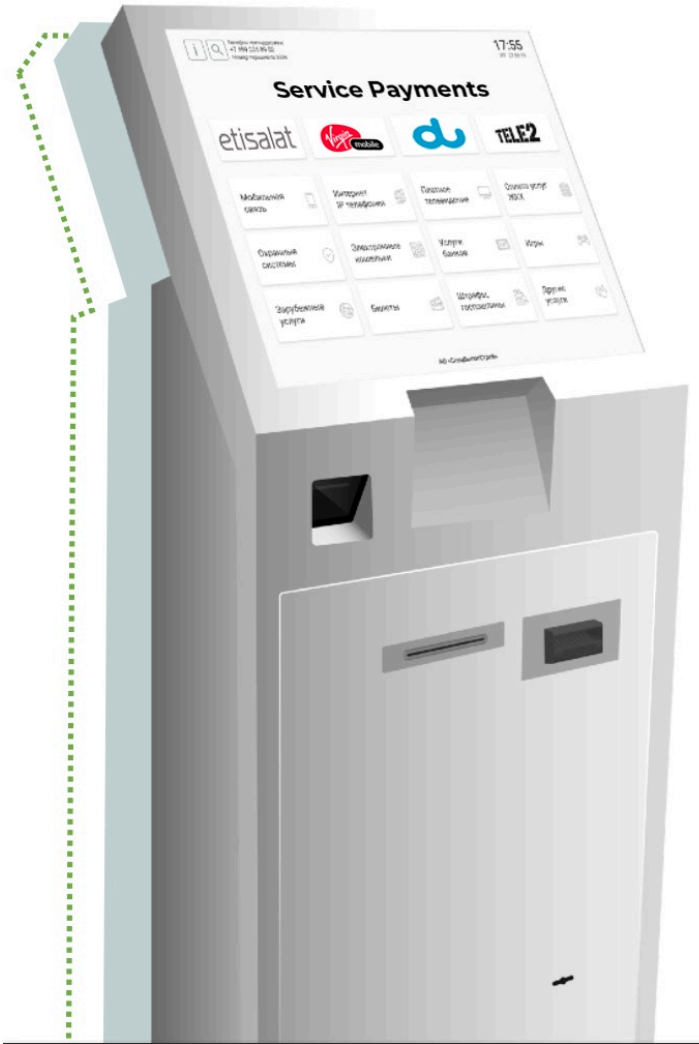
GENESIS BLOCK
IT challenge for your business

Payment Processing

MULTIFUNCTIONAL

Payment Terminals



We offer interactive kiosks and self-service terminals that will perform the work of an operator, cashier and sales consultant.

Under the control of a special software, your device will be able to accept any payments, sell tickets, place orders for goods, give access to banking products.

A huge selection of models for various applications will satisfy the requirements of the most demanding customers.

Automate workflows in your organization!
